Commissioners of the Engineering Workforce Commission, April 1, 1994

Ms. Betty R. Anderson, Director, College Relations Activity
General Motors Corporation

Dr. Eleanor Baum, Dean, School of Engineering
Cooper Union

Mr. John F. Betsch, Executive Staff of Vice President
Grumman Corporation

Dr. Theodore A. Bickart, Dean of Engineering
Michigan State University

* Mr. Donald C. Brown, Consultant
(Retired, Sun Company/Oryx)

Mr. Tim W. Collins, Manager, BS/MS Recruiting
Procter & Gamble Company

Mr. Dave Current, Manager, University Relations
Texas Instruments

Mr. Kenneth R. Dede, Manager, Personnel Relations/Research
Eastman Kodak Company

Mr. Edward J. Doyle, Consultant
(Retired, New Jersey Bell)

* Ms. Patricia L. Eng, Project Manager
Nuclear Regulatory Commission

* Mr. Donald E. Gatewood, Manager of Recruiting & University Relations
Union Carbide Corporation

Mr. Earl E. Gottsman, Vice President for Academic Affairs
Capitol College

* Mr. Lewis G. Grimm, Principal Associate
Gorove/Slade Associates, Inc.

Mr. David A. Kearney, Manager, University Relations
Westinghouse Electric Corporation

Mr. S. Joseph Kowalski, Consultant
Kowalski & Associates, Inc.

Dr. William K. LeBold, Director, Educational Research
Purdue University

* Dr. Gordon Lewis, Head, Department of Ceramic Engineering
Clemson University

* Mr. Roger D. Madden, Technical Director
Cycomm

* Mr. Daniel J. McGinley, Director of Curricula & Accreditation
American Society of Civil Engineers

Ms. Catherine Morrison, Director of Research
National Action Council for Minorities in Engineering

* Mr. William A. Nappi, Supervisor, Engineering Services
Illuminating Company of Cleveland

* Mr. James C. Nygaard, Senior Engineer
Bechtel Power Corporation

* Ms. Patricia Patterson, Manager, Mfg., Surveillance Systems Div.
Westinghouse Electric Corporation

Mr. Robert Rusek, Division Compensation Strategy Director
AT&T/Corporate

Dr. William M. Sangster, Director of International Programs
Georgia Institute of Technology

Mr. Donald G. Schroeter, Consultant
(Retired, Amoco Corporation)

Mr. H. Fred Shultz, Manager, Training & Employment
Exxon Research & Engineering

Mr. Lewis E. Shumaker, College Relations Supervisor
E.I. duPont de Nemours & Co., Inc.

* Mr. Glen J. Snyder, Consultant, SM/MS Inc.
(Retired, Babcock & Wilcox Company)

Mr. John F. Spencer, Manager, Engineering Management Services
Port Authority of New York & New Jersey

* Mr. James Donald Strong, President, The Stronghold Foundation
(Retired, U.S. Army/NSPE)

* Dr. Anthony L. Tilmans, Director of External Degree Programs
Southern College of Technology

Mr. Stephen B. Tucker, Program Manager of Higher Education Grants
General Electric Foundation

Dr. John F. Van Domelen, President
Wentworth Institute of Technology

* Dr. Glen Vanden Berg, Agricultural Project Coordinator
Beltsville Agricultural Research Center, USDA

Dr. M. Lucius Walker, Jr., Dean of Engineering
Howard University

Mr. Dan L. Ward, Manager, Human Resources Planning
Texaco, Inc.

Mr. Robert K. Weatherall, Director, Office of Career Services
Massachusetts Institute of Technology

* Ms. B. Lynn Wilson, Petroleum Engineering Associate
Amoco Production Company

Mr. Alan D. Wolfson, Strategic Resources Director
IBM Corporation

* Represents AAES member society

Sustaining, Contributing and Academic Associates

Patron Sustaining Associates :

AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES

The American Association of Engineering Societies (AAES) is a multidisciplinary organization dedicated to advancing the knowledge, understanding and practice of engineering in the public interest. Its members represent the mainstream of U.S. engineering—over 800,000 members in industry, government, and education.

Through its councils, commissions, committees, and task forces, AAES addresses questions relating to the engineering profession; issues public policy statements on such issues as sustainable development and technological competitiveness; conducts surveys of engineering personnel; represents the U.S. engineering community internationally in such bodies as the World Federation of Engineering Organizations and the Pan American Union of Engineering Associations; issues statistical studies of the engineering workforce, present and future; and publishes reference works such as *Who's Who in Engineering* and the *Thesaurus of Engineering and Scientific Terms*, and other publications such as *The Role of Engineering in Sustainable Development*.

AAES also conducts forums for leaders in engineering, industry, government and education for the discussion of issues affecting engineering and the public interest, including an annual government affairs conference and workshops, and the engineering roundtable.

1994 Officers

M. Jack Ohanian, Chair, Board of Governors
James E. Sawyer, Chair-Elect
Donald L. Hiatte, Secretary/Treasurer
Ernest L. Daman, Past Chair
Mitchell H. Bradley, Executive Director

ENGINEERING WORKFORCE COMMISSION

The Engineering Workforce Commission (EWC), formerly the Engineering Manpower Commission, has been a source of objective, timely data relating to the supply and demand for technological personnel since its organization in 1950. As an AAES Commission, EWC is composed of volunteers from professional engineering societies, academia, government, and industry, supported by a professional staff headed by AAES' Director of Research.

EWC conducts annual surveys of industry and schools of engineering, monitors trends in the supply of and demand for engineers, and produces annual reports on engineering enrollments, degrees, and salaries. In addition to its statistical studies, EWC also produces the *Engineering Workforce Bulletin,* which assesses trends in the engineering workforce including participation in the profession by women and ethnic minorities.

1994 Officers

Edward J. Doyle, Chair
Donald C. Brown, Past Chair
Dr. Glen Vanden Berg, Vice Chair and Chair, Enrollments Committee
Dr. Theodore A. Bickart, Chair, Education Committee

AAES Staff

Director of Research: R. A. Ellis
Director of Publications: Gordon Davis
Education Survey Manager: Claire LeBuffe

The Engineering Workforce Commission wishes to express its grateful appreciation for the cooperation of the hundreds of organizations that provided the data on which this report is based.

INTRODUCTION

This is the 26th annual report from the Engineering Workforce Commission (EWC) on enrollments in engineering and engineering technology in the United States. All data are for enrollment as of Fall 1993.

The printed report includes convenient information on enrollment for particular disciplines (groups such as civil engineering and electrical engineering technology) at specific institutions, as well as differing enrollment levels (such as first-year full-time undergraduate and part-time graduate). Subtotals for each state are included. The report also identifies the numbers of women, members of minority groups, and foreign students at each school.

In engineering, the study covers 336 institutions, including all of those with curricula approved by the Accreditation Board for Engineering and Technology (ABET). Some of these schools have newly initiated engineering programs which have not been included in previous enrollment reports from EWC. This report provides a comprehensive enumeration of engineering programs available in the United States today.

In engineering technology, the 1993 enrollment survey includes data from 263 schools. All schools with any ABET-approved technology curricula are covered, as well as a number of others. No coverage is provided of enrollment at the certificate level or of students in schools which provide two- or three-years of curricula in preparation for transfer into engineering programs.

This report consists of two parts: (I) engineering and (II) engineering technology. Enrollment for all students and for women, African Americans, Hispanic Americans, Native Americans, and Asian Americans is provided in both parts; foreign national enrollment is provided for engineering only.

In Part I, engineering enrollment is tabulated by the year in school—first year, second year, etc.—for full-time undergraduates, and by the type of degree sought—master's or professional engineering, and doctorate—for full-time graduate students. In Part II, technology enrollment is tabulated similarly by year in school. Data are also provided for post-baccalaureate students. Part-time students are tabulated separately at each level, irrespective of their year in school. Note that schools showing no data for particular full-time students may still have such students attending part-time.

Enrollment data are subject to many influences that may not be obvious to all readers. For example, first-year engineering enrollment is understated because not all entering students can declare majors; many students may need more than one year after reaching fourth-year status to complete their degrees; and schools offering both associate and bachelor's degrees in engineering technology do not follow uniform practices in classifying their students. Information on these and other quirks is included in footnotes to the tables in the *Summary Data* section that follows this introduction.

Four basic types of tabulations are provided, in addition to summary tables. The first is EWC's traditional summary of overall enrollment, across all programs, for each school covered in this report. Schools are listed alphabetically within states; state subtotals and grand totals are included. These data provide basic institutional and geographic measures of participation in engineering and technology programs.

The second general type of tabulation provides detailed enrollment data for the major engineering or technology curricula offered by these schools. Curricula are listed within some twenty broad engineering disciplines (e.g., chemical, civil, etc.); disciplinary subtotals are provided both within these listings and in the separate summary tables. Within each broad discipline, curricula are listed alphabetically by their detailed titles, within schools and states, thus preserving such distinctions as the differences between programs in general civil engineering, surveying engineering, and transportation engineering, in Part I, or civil technology and surveying technology in Part II.

The third set provides separate tables for each enrollment level—first year full-time, second year full-time, all part-time, etc. Enrollment is tabulated by broad disciplinary groups (aerospace, civil, electrical, etc.). Data is organized by institution, in alphabetical order by state. The format is similar to that used in EWC's degree reports.

The fourth type of tabulations provides national enrollment, programmatically, for each individual curriculum title, under broad discipline groups. In engineering, this provides a complete listing of programs in the United States (see pp. 155-167).

Like all of EWC's surveys of engineering enrollments and degrees since 1986, all tabulations in this report draw on a master data base on engineering and technology programs, in order to provide accurate, consistent, descriptive data. EWC's educational surveys also use the data base to generate the survey forms used to obtain these statistics. Participating institutions receive questionnaires that include the specific programs and other descriptive data applicable to a particular school. This simplifies data entry for all parties and improves the consistency and accuracy of the work.

Major efforts are made in these studies to obtain full cooperation from participating schools. In addition, when only partial responses are possible—for example, some schools cannot report the numbers of women who are enrolled in each specific combination of engineering program and year in school, but can report how many women are enrolled in each program, overall—then the overall data are prorated to generate reasonable approximations for data entry. As a result of these steps, the incidence of missing information in EWC's educational surveys has been greatly reduced. Consequently, these studies no longer use the estimates of missing data that appeared in our reports on enrollments and degrees before 1986. In addition, detailed codes are employed to report the precise adjustments used to deal with every response.

Our 1993 enrollment survey is also available in the form of machine-readable files on IBM-format floppy disks configured for use with Lotus Development Corporation's 1-2-3 spreadsheet software. These files include complete data on the distribution of students in each population tracked by EWC among all of the engineering and technology disciplines reported by EWC. They also include data on the sex of ethnic minority (and, for engineering, foreign national) students at each school. These data files are a powerful and convenient way to use personal computers to manipulate the Fall 1993 enrollment survey results, generating new tabulations that are not provided by EWC in its printed reports. A similar product is available for EWC's survey of engineering and technology degrees.

Any questions regarding the course content or other details of specific engineering or engineering technology programs should be directed to the participating schools. Other inquiries about EWC's educational surveys are welcome. Contact R. A. Ellis, Director of Research, American Association of Engineering Societies (see the inside back cover for address information). For ordering information and prices for either printed reports or machine-readable data disks, also see the inside back cover.

EWC'S ERROR CHECKING SYSTEM

Our annual surveys of degrees and enrollment utilize a data entry system which enhances control over every point of production. This system automatically performs checks on the validity of data as it is entered. The software insures against both duplicate and missing program entries. Individual lines of program data are examined to insure that details for women, and for minorities and foreign nationals, do not exceed totals. The system has identified some recurring problems in data submitted by schools over a number of years (for example, some schools have regularly over-counted the numbers of ethnic minority or foreign national students). Problems that are due to errors in data entry are easily rectified; other anomalies require contact with each school to determine correct data. While entered data is awaiting corrections, it is flagged and stored in a separate provisional database, to be retrieved once corrected data is received.

As it is entered, each line of data is compared against similar information submitted to EWC the previous year. Thus, we now automatically track large fluctuations in the enrollment statistics for the individual programs for which we have previous data. If the updated school information, accreditation, or curricula group assignments are not recognized by the system, the system calls for appropriate actions by the survey staff. Response codes, used for schools that submit incomplete data, are automated to provide more specific descriptions of missing coverage. The system recognizes whether the selected response code is valid for the program to which it is assigned.

The largest burden of enrollment survey production is the need to contact the schools for data corrections, missing data, and lack of response. After exhausting all possible means of getting complete and correct information from the schools, EWC resorts to implementing response codes, reasonable estimates, and substituting previous data.

As in earlier enrollment surveys, responses from previous years were used when schools were unable to provide current data. No attempt was made to substitute data for technology programs that were not accredited by ABET. EWC had traditionally limited substitutions to the previous year only; in 1987 this rule was modified to permit older substitutions of data where available, rather than lose a school altogether or rely on less valid forms of estimation. In 1993, 95 percent of the engineering schools contacted by EWC for enrollment data were able to meet our very demanding deadline. A complete accounting of the substituted cases follows.

NEW SCHOOLS AND NAME CHANGES IN 1993

Capitol College (Maryland) reported engineering students for the first time. Roger Williams University reported that they now have an engineering program, but they were unable to return a survey so no data are available. The University of Alabama has closed its engineering technology program.

In June, Washington University's School of Technology and Information Management (STIM) was incorporated into Washington University and, thus had no fall enrollment. University of Southern Mississippi, Gulf Park reported its students with the University of Southern Mississippi, and thus is no longer listed.

A number of other name changes were reported. Sumter Area Technical College (North Carolina) became Central Carolina Technical College and the SUNY Agricultural and Technical College at Farmingdale became the SUNY College of Technology at Farmingdale.

MISSING AND SUBSTITUTED DATA

In a few cases, Fall 1993 enrollment reports could not be obtained by EWC. However, 1992 reports were available, and were substituted for the missing data. When these schools appear in tabulations, they are flagged with a special response code "2." In a few cases, older reports from 1991 and 1990 were substituted, and the code becomes "1" or "0."

There were a few schools for which no substitution was made, because either no data were available or the old data would not be a reasonable substitution, since the system has undergone several changes. This is true for the programs at the New York City Technical College/CUNY and the Connecticut technical colleges — Capital Valley Community Technical College, Naugatuck Valley Community Technical College, Norwalk Community Technical College, and Three Rivers Community Technical College — they all have undergone several changes and no substitutions were made. Also Roger Williams University reported that they now have engineering students, but did not supply any data, so substitution was impossible.

The substituted schools are:

Engineering Schools: substituted responses for seventeen institutions:

University of Alaska Fairbanks
San Francisco State University (California)
West Coast University (California)
National Technical University (Colorado) (1991 data)
Hartford Graduate Center (Connecticut)
Catholic University of America (District of Columbia)
Mercer University (Georgia)
University of Southern Maine
Oakland University (Michigan)
University of Minnesota, Duluth
Case Western Reserve University (Ohio) (graduate only)
Villanova University (Pennsylvania)
Widener University (Pennsylvania) (1991 data)
Wilkes University (Pennsylvania)
University of Tennessee-Chattanooga
George Mason University (Virginia)
Marquette University (Wisconsin) (graduate only)

Engineering Technology Schools: responses for nineteen schools with ABET-approved curricula were substituted:

City College of San Francisco (California) (1991 data)
Augusta Technical Institute (Georgia) (1991 data)
DeKalb Technical Institute (Georgia)
Atlantic Community College (New Jersey)
Albuquerque Technical Vocational Institute
  (New Mexico)
New Mexico Highlands University
Bronx Community College (New York) (1991 data)
Queensborough Community College of the
  City University of New York
SUNY: College of Technology at Canton (New York)
Technical Career Institute (New York)
Davidson County Community College (North Carolina)
Central State University (Ohio)
Clark State Community College (Ohio)
Kent State University, Tuscarawas (Ohio) (1990 data)
Roger Williams University (Rhode Island) (1991 data)
Florence-Darlington Technical College
  (South Carolina) (1991 data)
Horry-Georgetown Technical College
  (South Carolina) (1991 data)
Nashville State Technical Institute (Tennessee)
Central Washington University (Washington)

EXPLANATION OF SYMBOLS AND ABBREVIATIONS

The "T-A-R" Codes:

The enrollment survey uses a three- (in limited cases, four-) position alphabetical coding system to denote school types, institutional-level accreditation, and (if applicable) special conditions that explain a school's response to the survey. These codes are constructed as follows:

T: Type of School:

"S" means state or other public control, including municipally-sponsored schools, but excluding the federal service academies.

"F" denotes the federally-sponsored schools.

"N" means nonsectarian, nonprofit private institutions.

"R" denotes religiously affiliated private institutions.

"P" denotes proprietary schools.

"C" denotes combined public and private sponsorship, e.g. Cornell University.

A: School Accreditation:

School-level ABET accreditation codes were updated for this report. See below for program-level accreditation information.

"B" means that the school has ABET-approved courses in both engineering and technology.

"E" means at least one engineering program is accredited by ABET.

"R" means the school does not have ABET-accredited courses but is approved at the institutional level by regional accreditation agencies like the Southern Association of Colleges and Schools.

"T" means that at least one technology program is accredited by ABET.

R: Response:

These codes appear only when applicable; they are not necessarily identical to the similar codes used in earlier enrollment reports. Codes are listed here in alphabetical order. Users should note that some response codes have two digits.

"A" means that all details (women, minorities, and foreign nationals enrolled in engineering programs) are missing from the response. There may be such students at the school but they will not show up in the tabulations for the specific population groups. The numbers for all enrolled students are not affected.

"B" means that no details were provided for women.

"C" means that no details were provided for foreign nationals.

"CE" means that no details were provided for foreign nationals and that full and part-time details were prorated.

"D" means that no details on minorities or foreign nationals were provided.

"E" means that no details were provided for minority groups.

"H" means that part-time enrollment was not separated from full-time enrollment.

"J" means that details for part-time students were not available.

"KE" means that the Hispanic American category includes Native Americans and Asian Americans.

"KW" means that no details were provided for African Americans.

"L" means that no details were provided for foreign nationals or part-time foreign nationals.

"P" means that some data were developed by EWC, by prorating accurate aggregates (such as information on all women students) among the various programs at a school.

"Q" means that the fifth year category represents students that are "unclassified".

"S" means that all full-time students were listed in the second year. (Associate enrollment only)

"SH" means that all students (full and part-time) were listed in the second year. (Associate enrollment only)

"2" denotes a substituted response using data originally submitted for Fall 1992. Fifteen engineering schools and twelve technology schools were treated with such data.

"1" denotes a substituted response using data originally submitted for Fall 1991. Two engineering schools and six technology schools were treated with such data.

"0" denotes a substituted response using data originally submitted for Fall 1990. One technology school was handled with this older data.

Examples: "TAR" code of SB: this is a publicly supported school with ABET-approved programs in both engineering and engineering technology. "TAR" code of RR0: this is a religious-affiliated school, regionally accredited, which has been handled with a substituted 1990 response. "TAR" code of NEC: this is a private, nonsectarian school with ABET-accredited engineering programs and missing details for foreign nationals.

Program-Level Accreditation Codes:

Program-level ABET accreditation codes were **not** updated for this study. Usually ABET updates are made in the enrollment survey, however ABET was unable to provide us with updated information in time for this survey. Note that EWC's program-level accreditation codes reflect only ABET certifications, and do not allow for program-level approvals from the accreditation board for computer and information science. These codes are used only in the tabulations for specific curricula:

> "A" denotes ABET accreditation at the associate degree level.
>
> "B" denotes ABET accreditation for the program at the bachelor's level.
>
> "M" denotes ABET accreditation at the master's level (now only rarely used for programs with no B.S. equivalent).
>
> "N" denotes programs with no ABET accreditation. In general, where program titles match across degree levels, higher-level offerings will be flagged with the corresponding lower-level code if such an ABET certification exists. However, many situations exist where this rule cannot be unambiguously applied. For example, we have generally labeled master's level programs in engineering mechanics as "N" for "no ABET accreditation" even when an ABET-approved BS curriculum in mechanical engineering is offered. If an undergraduate program in engineering mechanics existed, then a "B" code would have been used for any corresponding higher-level program. In general, ABET does not attempt to accredit graduate programs, and codes at this level (other than the rare "M" designations) are meant only to denote the existence in an institution of an ABET-approved undergraduate course with an identical designation.

Discipline Category Abbreviations:

ACN = Air Conditioning/Heating/Refrigeration (technology only)
AER = Aerospace and related
AGR = Agricultural (engineering only)
ARC = Architectural
AUT = Automotive (technology only)
BIO = Bioengineering (engineering only)
CER = Ceramics (engineering only)
CHE = Chemical
CVL = Civil and Construction (engineering); Civil only (technology)
CON = Construction (technology only)
CMP = Computer
ELC = Electrical/Electronic (engineering); Electrical only (technology)
ELM = Electromechanical (technology only)
ELX = Electronic (technology only)
ENS = Engineering Science
ENV = Environmental (engineering only)
GNL = General Engineering
IMM = Industrial/Manufacturing/Engineering Management; in some tabulations these programs are broken out as follows:

  IEM = Engineering Management (engineering only)
  IMF = Manufacturing
  IND = All Other Industrial

MAR = Marine
MTL = Materials/Metallurgical (engineering); Materials only (technology)
MEC = Mechanical
MGN = Mining/Mineral/Geological (engineering); Mining/Metallurgical/Welding (technology)
NUC = Nuclear
PET = Petroleum/Natural Gas (engineering only)
PRE = Pre-engineering (undergraduate engineering only)
SYS = Systems (engineering only)
OTH = Others (including Agricultural, Biomedical, Environmental and Petroleum Technology)

MISCELLANEOUS NOTES

First-year enrollments are incompletely covered in these surveys, for a variety of reasons, including the fact that at many schools first-year students cannot declare a major field. The under-enumeration is consistent from one year to the next, so EWC's first-year time series data are reliable as an indicator of trends, even though they fall considerably short of a total enumeration.

In 1987, EWC stopped its partial coverage of enrollment in community colleges, junior colleges and four-year colleges that do not have their own engineering degrees, but prepare students to transfer into other institution's engineering programs.

Women reported include minorities and foreign nationals. Ethnic minorities are limited to U.S. citizens, immigrants, or other permanent residents. "Foreign Nationals" are students in the United States on F-1 (student) or J-1 (exchange) visas, and exclude immigrants or other permanent residents. Since 1990, EWC has requested, for all programs combined, the number of ethnic minority and foreign national students by sex. Most institutions provide this information; a few have difficulty providing data at this level of detail. The results at the national level are reported in the *Summary Data* section following this introduction. As noted above, the detailed results are included on our machine-readable floppy disks. For ordering information, see the inside back cover.

SUMMARY DATA

CONTENTS OF THE SUMMARY DATA SECTION

Six summary tables are provided. Following explanatory comments on each of them, we provide a brief assessment of engineering and technology enrollment trends as they appear as this is written, during the first quarter of 1994.

All the tabulations in this section include footnotes that provide additional information on the nature and limitations of these statistics. In particular, the notes explain why the numbers of reported third-year and fourth-year undergraduates rise in these surveys, instead of remaining constant or even declining. The reader is referred to these notes for further details.

Table 1: All Engineering Students, Fall 1993, by Detailed Discipline Groups, Population Categories, and Enrollment Levels. The data provide a concise summation of participation in undergraduate and graduate engineering programs as of the Fall of 1993, for 23 engineering disciplines plus a 24th category for pre-engineering students, including the number of students who are women, members of four minority groups, and foreign nationals. These breakdowns include details for enrollment in engineering management and manufacturing engineering as well as other kinds of degrees traditionally classified by EWC under the broad heading of "industrial engineering." Owing to limitations of space, those details of industrial engineering programs are not included in the school-by-school tables provided in this report. However, the more detailed industrial engineering categories are used in the curriculum-level tabulations provided for all students, and they are available on a school-by-school basis for specific population groups in the much more flexible format provided by EWC's machine-readable data files.

Table 2: All Engineering Students, Fall 1993, by Population Categories, Gender, and Enrollment Levels. The table provides a national gender breakdown for nine levels of undergraduate and graduate enrollment, plus two subtotals for full-time students, for all students and for each of the ethnic and nationality populations tracked by the Commission. The table also provides a complete accounting for cases where the gender of the students was unknown (because some schools were unable to provide these details).

Table 3: Fall Engineering Enrollments, 1984-1993. This time series table provides a concise summary of trends in engineering enrollments during the last ten years.

Tables 4-6: these tabulations provide statistics for engineering technology degrees that are comparable to the data on engineering awards described for Tables 1-3 above. The time series tabulation (Table 6) is limited to seven years, because stable longitudinal statistics from EWC's surveys of engineering technology have only been available since 1987. (In 1986, the Commission moved to achieve 100 percent coverage of all ABET-accredited technology schools, and certain critical improvements were adopted in 1987 in our handling of disciplinary assignments; Table 6 is now feasible because of those changes seven years ago.)

CURRENT TRENDS

As in the past, extended commentary on trends in engineering enrollment will be provided in EWC's *Engineering Workforce Bulletin* issue number 132 (April 1994), "Engineering Enrollment Highlights, Fall 1993." However, the broad picture can be summarized as follows:

Overall undergraduate enrollments decreased for the first time since 1989. This decrease was seen at all levels except the fourth year which stayed more or less even and the fifth year which increased. The decline in full-time undergraduate students was a little less than 2 percent, the largest decline was seen in first-year students — almost a 5 percent drop from Fall 1992 levels.

As in previous years, the proportion of women and minorities continued to grow. The first-year figures remained steady with women accounted for over 19 percent of the first-year students, and underrepresented minorities (African Americans, Hispanic Americans, and Native Americans) accounted for 17 percent. Furthermore, their proportion of total undergraduate enrollment grew.

In the major engineering disciplines, undergraduate participation in aerospace, electrical and mechanical engineering declined, while bioengineering, chemical, civil and environmental engineering increased. Most other disciplines held steady or decreased slightly.

Graduate enrollment in engineering also showed some declines from 1992 levels. The full-time master's degree candidates shrank over 1 percent, while full-time doctoral candidates increased 3 percent and part-time graduate enrollment dropped 2 percent. The share of women and underrepresented minorities enrolled in graduate programs continued to grow, while the share of foreign nationals declined at all levels of graduate enrollment.

Due to the shifting nature of the engineering technology profession and to changes in EWC's approach to coverage of these curricula, in order to assess trends in engineering technology EWC uses only data from programs approved by the Accreditation Board for Engineering and Technology (ABET). These figures show that there was a decline in full-time undergraduate enrollments in the Fall of 1993 of almost 8 percent, while the number of first-year student dropped even more. Because some schools were unable to provide information these shifts may be a little exaggerated, but there has been a definite downswing from Fall 1992 levels.

TABLE CONTINUES ON THE FOLLOWING PAGE...

* Note: Population groups are neither exhaustive nor mutually exclusive, and will not sum to totals. In particular, women are also counted in both the ethnic and foreign national categories; see Table 2, dealing with combinations of gender and populations groups, for details on this overlap. Foreign nationals are NOT counted in ethnic groups, which are for U.S. citizens and permanent residents.

TABLE CONTINUES ON THE FOLLOWING PAGE...

* Note: Some schools where first year students cannot declare major fields estimate the number of first year students who will enter engineering programs; others make no estimates and do not report any first-year enrollments to EWC. Other students included in this group are enrolled in formal pre-engineering or "freshman engineering" programs. The Commission does not track "pre-engineering" or "engineering science" transfer programs at two or four year schools with no engineering programs of their own. Transfers of such students into traditional engineering programs cause enrollments to rise for the third and fourth year levels.

---

* Note: Data for "All Students" are identical to those statistics in Table 1 and are reproduced here for the convenience of the reader. A few schools are unable to provide any sort of gender breakdowns for their students, which is why the sum of men and women for the "All Students" categories falls short of the count of total enrollment. A larger number of schools can provide overall breakdowns by gender but cannot furnish detailed data for every combination of gender and populations category — which is why the numbers of "Gender Unknown" are larger, in total, for the populations groups than they are for the data on all enrolled students. Population groups are neither exhaustive nor mutually exclusive, and will not sum to totals.

Total, ABET-accredited*	258	264	270	277	281	284	289	303	309	310

---

* Note: ABET-accredited means that at least one program at the school is accredited by ABET. Some institutions are accredited separately by ABET but report jointly to EWC; in other cases, ABET may allow accreditation actions to include satellite campuses that report individually to EWC. Counts of the number of institutions may also be influenced by decisions at the local level as to the organization and autonomy of units in state higher education systems; for example, the University of Tennessee's Space Institute, which has sometimes reported separately to EWC in the past, is now covered by data submitted by the parent campus at Knoxville. For such reasons, ABET and EWC counts of the number of engineering institutions will not be identical. EWC's coverage of U.S. engineering institutions is comprehensive, including all schools approved by ABET as well as others, with the following exceptions. First, newly initiated programs may not become immediate participants in the Commission's annual surveys. Second, the studies do not cover a few institutions affiliated with teaching hospitals that offer graduate programs in biomedical engineering but no other form of engineering curricula. Third, as noted elsewhere, EWC does not track enrollment in pre-engineering transfer programs offered by a large number of two-year and four-year colleges with no other form of engineering education. Flows of students into engineering from these programs are very substantial, as is shown by the increases in enrollment at the third-year and fourth-year levels in EWC's own data. However, coverage of these programs would require substantial increases in the number of institutions reached by the annual surveys. Fourth, data on first-year enrollments are also understated because at many schools entering students cannot declare majors. Readers should also be aware that students may take more than four years to finish an engineering curriculum; often they may have completed enough credits to be classed as fourth-year students, but will need more than one more year of study to finish requirements for their degree. Accordingly, fourth-year enrollment statistics in this survey include some students who will graduate in 1994 as well as those scheduled to get degrees in 1993. Fifth-year students are those formally enrolled in five-year programs; in the past, some schools have also used this category to report special students or other non-degree candidates. Data on non-degree enrollment are removed from the survey by EWC staff when they can be identified as such, as this study is intended to track only degree candidates. In the future it may be possible to add separate reporting categories for special students, graduate engineers who are not pursuing a degree but who wish to obtain additional training, and so on.

TABLE CONTINUES ON THE FOLLOWING PAGE...

---

* **Note: Population groups are neither exhaustive nor mutually exclusive, and will not sum to totals. Women are included in ethnic categories; see Table 5 for details on this overlap. Note that EWC does not track foreign national enrollments in engineering technology programs. Users of these tables should be aware that schools offering technology programs at both associate and bachelor's degree levels do not follow uniform conventions for enrollment classifications; some institutions treat all first and second year students as associate degree candidates, and report no bachelor's degree candidates for those levels, while others separate these students into associate and bachelor's groups.**

TABLE CONTINUES ON THE FOLLOWING PAGE...

* **Note:** The only technology programs classed by EWC as "engineering science" are those analogous to similar specialities in engineering (for example, optical engineering technology). The term "engineering science" is sometimes used to denote two-year pre-engineering transfer programs, but these are not tracked in EWC's surveys.

---

* **Note: Data for "All Students" are identical to these statistics in Table 4, and are reproduced here for the convenience of the reader. A few schools are unable to provide any sort of gender breakdowns for their students, which is why the sum of men and women for the "All Students" categories falls short of the count of total enrollment. A larger number of schools can provide overall breakdowns by gender by cannot furnish detailed data for every combinations of gender and populations category — which is why the numbers for "Gender Unknown" may be larger, in total, for the population groups than they are for the data on all enrolled students. Population groups are neither exhaustive nor mutually exclusive, and will not sum to totals.**

* Notes: ABET does not accredit post-baccalaureate programs (there are rare exceptions for programs leading directly to the Master's as a first professional degree). Post-baccalaureate enrollments reported in Part II of this table result from the Commission's practice of referencing the ABET status of corresponding undergraduate curricula where a school has both undergraduate and graduate programs with identical titles. Some institutions are accredited separately by ABET but report jointly to EWC; in other cases, ABET accreditation actions include satellite campuses that report individually to EWC. Due to these differences, ABET and EWC counts of the number of engineering technology institutions will not be identical. The Commission's coverage of engineering technology institutions includes all schools approved by ABET as well as a limited number of others. Complete coverage of ABET-accredited technology schools began in 1987; the time series for ABET-approved programs beginning in that year is EWC's most trustworthy indicator of trends in engineering technology. The Commission does not attempt to provide comprehensive coverage of all schools that offer technology curricula; this would require that we add hundreds of institutions with small programs to the annual surveys. In general we believe the survey coverage is good, especially for programs leading to bachelor of technology degrees. Data for the State of Florida, where EWC is often able to obtain statistics for all community colleges in the state by working through the offices of the Florida Department of Education in Tallahassee, provide an example of the kind of information that these surveys may not pick up elsewhere. In general, definitions and other conventions that influence data collection are less clear-cut for engineering technology than for engineering itself. For example, one of the ABET-approved Florida schools, St. Petersburg Jr. College, prefers to report directly to EWC even if the Tallahassee office has provided data for the school, because it favors a more stringent definition of what constitutes an "engineering technology program." In short, enrollment (and degree) data on engineering technology are more subject to uncertainty than are corresponding statistics for engineering, especially in time series.

Illustrative Data Collection Form

ENGINEERING WORKFORCE COMMISSION
SURVEY OF FALL 1993 ENROLLMENT IN ENGINEERING AND ENGINEERING TECHNOLOGY

American Association of Engineering Societies 1111 19th Street NW Suite 608 Washington, DC 20036-3690 (202) 296-2237

U Kansas **DEADLINE: NOVEMBER 15, 1993** **Page 1 of 1**

Bachelors Enrollment in Engineering

If necessary, correct and/or update mailing label and these data:

Mailing Label

Carl E. Locke, Dean
School of Engineering
U Kansas
4010 Learned Hall
Lawrence, KS 66045-

School Type S:Public (State or Municipal)
School accreditation for engineering E: ABET Engineering
Dean of Engineering (or equivalent):
Name Carl E. Locke, Dean
Phone (913) 864-3881
Person to contact concerning data on this form:
Name Ann Bakerinx
Title Academic Director
Phone (913) 864-3881

Who completed this form? ____________________

INSTRUCTIONS — PLEASE READ BEFORE COMPLETING FORM

This is EWC's survey of all engineering and engineering technology enrollments for Fall 1993. All engineering programs at your school should be reported, including any programs outside the school of engineering. The dean of engineering or equivalent should review all the data, resolve any questions as to the inclusion of particular programs, and make estimates, if necessary, to fill in all incomplete items of information.

1 Check the mailing label and school information above. Make changes as necessary. Be sure to check Dean and contact person information.

2 Check that correct forms for your school have been provided. (Separate forms are provided for engineering and technology programs, and for each level of program--associate, bachelor, graduate, etc.--within these categories.) Do NOT report students on inappropriate forms. If additional or different forms are needed, call us at (202) 296-2237.

3 For each line of pre-printed data, review degree titles, ABET status, and program group (located in the second and third columns from the left). Correct any errors. Cross out titles which no longer apply. Enter new titles on blank lines. ABET status reflects those in effect for the 1993-1994 academic year. See codes and abbreviations below.

4 For each program, enter the **TOTAL** number of students, based on year and full/part-time status, in the first set of columns. These figures should include both men and women enrolled. Students enrolled in dual degree programs should be counted **ONLY** once. If necessary make a new program title.

5 In the next set of columns, enter the number of **WOMEN** students by year and full/part-time status (these figures should include all women, regardless of race, ethnicity, or citizenship).

6 Skip to the last set of columns on the right and enter the number of **FOREIGN NATIONAL** students—people in the U.S. on student (F-1) or exchange (J-1) visas—by year and full/part-time status.

7 Finally, enter the number of **ETHNIC MINORITIES** enrolled in each category who are also **citizens** or **permanent residents** of the U.S. (including **foreign-born students on immigrant visas**). Do NOT include any foreign national as an American ethnic minority. NO ONE should be counted in more than one ethnic minority group. These figures should include **both** men and women of ethnic minority groups who are enrolled. We are interested in four seperate groups of peoples: African Americans/Blacks; Hispanic Americans/Latinos; Asian Americans, including Americans of Pacific, South Asian, and Middle Eastern origin; and Native Americans/American Indians, including Eskimos and Aleuts.

8 After entering data by program for all students, women, ethnic minorities and foreign nationals, enter **TOTALS** for each column across the bottom of the chart. Remember to enter **THREE** lines of totals for every column. For each column there should be a total for **only men**, for **only women** and a grand total for **all students**. These totals provide crucial gender information on ethnic minorities and foreign nationals.

9 Enter **ZERO** if there are no students in a particular category. **ITEMS LEFT BLANK WILL BE ASSUMED TO BE UNKNOWN.** A correctly completed form should have NO blank items, because items for which firm data is not available should be estimated by the deans or their appointed representatives. If you are unable to provide any of the requested data, please make some **INDICATION** on each form.

The data on women, minorities, and foreign nationals are vital. We find that virtually all institutions do possess these statistics, although often they are maintained in such places as offices of minority affairs, institutional research, etc.

10 **REVIEW ALL ENTRIES. DOUBLE CHECK YOUR MATH!**

If you have ANY problems, call Claire LeBuffe or Dick Ellis for help at (202) 296-2237. *We must have your completed response by November 15, 1993. A business reply envelope is provided for your convenience.*

We are obtaining nearly 100 percent cooperation from all U.S. engineering institutions and all technology schools with ABET-approved programs; we seek participation from other schools with engineering technology programs, as well. The data you provide is the authoritative source on the production of engineers in the United States, and is used by agencies of government, corporations, journalists, and researchers. Thanks for your help.

CODES AND ABBREVIATIONS

ABET STATUS: a program-level accreditation code "A", denotes ABET accreditation for associate-level offerings; "B," for bachelor-level programs; "M" (rarely used), for masters-level programs; "N" stands for programs not approved by ABET. Codes reflect statuses for the 1993-94 academic year. Graduate programs may be tagged with these codes if a school happens to have an ABET-approved program at the undergraduate level with an identical title.

Engineering Program Group Codes:

- ✓ AER (Aerospace)
- AGR (Agricultural)
- ARC (Architectural)
- BIO (Biomedical)
- CER (Ceramic)
- CHE (Chemical)
- CVL (Civil & Construction)
- CMP (Computer)
- ELC (Electrical & Electronic)
- ENS (Engineering Science)
- ENV (Environmental)
- GNL (General Engineering)
- IEM (Engineering Management)
- IMF (Manufacturing)
- IND (Industrial)
- MAR (Marine & Naval Architecture)
- MTL (Materials & Metallurgy)
- MEC (Mechanical)
- MGN (Mining, Mineral, Geosciences)
- NUC (Nuclear)
- PET (Petroleum & Natural Gas)
- SYS (Systems)
- OTH (Others)

Engineering Technology Program Group Codes:

- ACN (Air Conditioning/Heating/Refrigeration)
- AER (Aeronautical)
- ARC (Architectural)
- AUT (Automotive)
- CHE (Chemical)
- CVL (Civil, Highway, Surveying)
- CMP (Computer)
- CON (Construction)
- DRF (Drafting & Design)
- ELC (Electrical)
- ELM (Electromechanical)
- ELX (Electronic)
- ENS (Engineering Science—used only for programs like Optical Technology, as EWC does NOT cover Pre-Engineering or equivalent curricula)
- GNL (General Engineering Technology)
- IMF (Manufacturing)
- IND (Industrial)
- MAR (Marine)
- MTL (Materials)
- MEC (Mechanical)
- MGN (Mining, Metallurgical, Welding)
- NUC (Nuclear)
- OTH (Others, including Agricultural, Biomedical, Environmental, and Petroleum Technology programs).

ENTER TOTALS IN EACH BOX BELOW ACROSS THE PAGE (USING ZEROS WHERE NECESSARY). IF BACHELOR ENGINEERING ENROLLMENTS CONTINUE PAST THIS PAGE, ENTER TOTALS ON LAST PAGE ONLY.

ENGINEERING WORKFORCE COMMISSION PUBLICATIONS

Custom runs of degree, enrollment or salary data are possible; call us for details. Our machine-readable products are provided on IBM-standard $5^{1}/_{4}$" or $3^{1}/_{2}$" floppy disks and include most, but not all, of the details available in EWC's printed reports; in the case of the enrollment disks, data is also provided that is not included in the printed materials. For more information, contact the AAES Research Department.

ENGINEERS' SALARIES: SPECIAL INDUSTRY REPORT 1994 (published July 1994)

A detailed breakdown of engineering salaries according to type of industry, geographic regions, company size, employee experience, highest degree held, and supervisory status. Tables and graphs depict salaries in medians, quartiles, deciles and means. member price: $169.00 non-member price: $287.50

PROFESSIONAL INCOME OF ENGINEERS 1994 (published July 1994)

An abridged version of the Special Industry Report. Details for salary differences by highest degree held are not included; tabulations are added on engineering compensation in local, state and federal government agencies.
member price: $70.00 non-member price: $115.00

SALARIES OF ENGINEERS IN EDUCATION 1994 (published July 1994)

Median, quartile, decile and mean salaries across 18 experience brackets for engineering faculty, by academic rank, contract types, and type of institution. member price: $70.00 non-member price: $112.00

ENGINEERING AND TECHNOLOGY ENROLLMENTS, FALL 1993 (published April 1994)

An overview of the enrollment of students in engineering and engineering technology programs throughout the nation. Details by fields of study for specific schools and states, with added tabulations for women, minorities, and foreign nationals.
member price: $120.00 non-member price: $195.00
Machine-readable data files for Lotus 1-2-3: member price: $595.00 non-member price: $795.00

ENGINEERING AND TECHNOLOGY DEGREES 1993 (published December 1993)

A comprehensive report on recent engineering and engineering technology degrees that provides general statistics for schools and states on degrees in 40 engineering and technology disciplines, data for awards to women, minorities, and foreign nationals, and detailed data for specific curricula. member price: $140.00 non-member price: $230.00
Machine-readable data files for Lotus 1-2-3: member price: $595.00 non-member price: $795.00

ENGINEERING WORKFORCE BULLETINS (eight issues throughout the calendar year)

Concise, timely information on trends in engineering salaries, enrollments, degrees, women and minorities in engineering, other topics.
Full subscription year: member price: $69.00 non-member price: $112.00
Single copies: member price: $9.00 non-member price: $14.00

NOTE: Back issues of the *Engineering Workforce Bulletin* and most of EWC's printed reports are available.

TO ORDER:

Member prices are available to members of AAES member societies, employees of Industry Affiliates, and educational institutions or firms that have participated in the study to be purchased. Special prices are available to employees of EWC Sustaining Associates and their subsidiaries, and employees of EWC Academic Associates. Please include society affiliation and membership number, Industry Affiliate, EWC Sustaining Associate, EWC Academic Associate, or survey participant information with your order, if applicable. First class postage (U.S. domestic) is included in the purchase price. Foreign orders add 10%; check must be payable in U.S. funds. Visa and MasterCard charges are also accepted (include account number, expiration date and signature). Orders charged to Visa and MasterCard accounts may be placed directly by phone (U.S. only) at 1-800-658-8897. Mail orders should be directed to the AAES Publications Department, Suite 608, 1111 19th St. N.W., Washington, D.C. 20036-3690.
